Joseph Hazel

Group Chief Executive Officer
Apex Health

Our ESG strategy marks a defining milestone in our mission of shaping a healthier and more sustainable future. This launch reinforces our commitment to embedding Environmental, Social, and Governance principles across every part of our organisation setting a clear path for how we will operate responsibly, support our people and communities, and protect our environment while delivering world-class healthcare.

Our strategy aligns with the Geneva Sustainability Centre of the International Hospitals Federation, which measures hospitals' performance across three domains: Environment (carbon, energy, waste and water efficiency), Health & Wellbeing (staff, patient, and community impact), and Leadership & Governance (strategy, accountability, and transparency) — all to drive sustainable, resilient, and equitable healthcare.

Our strategy also aligns with the United Nations Sustainable Development Goals, the Ten Principles of the UN Global Compact, and the Qatar National Vision 2030 — ensuring Apex Health continues to meet the highest global and national sustainability standards.

To drive this forward, a cross-functional ESG Committee, chaired by the Group CEO and supported by ESG Champions across all business units, oversees implementation. We are launching awareness and training programmes, expanding environmental and social initiatives, and introducing Quarterly ESG Performance Reports to measure our progress.

This framework is a collective pledge to lead by example — and to make Apex Health a benchmark for an Ethical, Sustainable, and Resilient Healthcare System. I invite every stakeholder — patient, employee, investor, and community partner — to hold us accountable.

Shaping a Healthier, Sustainable Future

Apex Health manages 8 hospitals across 4 countries, with 2,700+ beds under management and a growing pipeline of international projects. Founded on the belief that healthcare is both a human right and a strategic investment, Apex Health operates with a commitment to trusted quality, ethical governance, and sustainable growth.

FRAMEWORKS & ALIGNMENTS

Geneva Sustainability Center (GSC)

Geneva Sustainability Centre (GSC) is a global healthcare sustainability initiative established by the International Hospital Federation. It supports healthcare organizations in improving environmental sustainability, social responsibility, and governance practices, helping create more resilient and sustainable healthcare systems worldwide.

UN Sustainable Development Goals

The UN Sustainable Development Goals (SDGs) are 17 global goals established by the United Nations to promote a more sustainable, equitable, and prosperous future by 2030.

GSAS Green Building Standard

GSAS Green Building Standard is a comprehensive sustainability rating system developed in Qatar to assess and improve the environmental performance of buildings and infrastructure. It promotes energy efficiency, resource conservation, occupant well-being, and sustainable development throughout the project lifecycle.

EPIHC — Ethical Principles in Healthcare

EPIHC (Ethical Principles in Healthcare) is an initiative that promotes ethical principles and responsible decision-making across healthcare organizations. It supports transparency, accountability, patient rights, and professional integrity to ensure high-quality, patient-centered care.

GRI Standards (Global Reporting Initiative)

GRI Standards are global reporting guidelines that help organizations disclose their economic, environmental, and social impacts, promoting transparency and sustainability.

Qatar National Vision 2030

Qatar National Vision 2030 is Qatar's long-term development framework that aims to build a sustainable and diversified economy while advancing human, social, economic, and environmental development for future generations.

Four Pillars of Sustainability

Aligned with the United Nations 2030 Agenda and guided by the Geneva Sustainability Center — with clear goals, actions and KPIs for each pillar

1

SDGs 7, 12, 13

Environmental Protection

- Net zero carbon emissions by 2030 (Scope 1, 2 & 3)
- 10% electricity reduction target by 2026
- LEED embedded in all new hospital designs
- GSAS-certified hospitals — TVH 3★, KMC 2★
- 10% increase in recyclable waste target
- Sustainable procurement policy under development

2

SDGs 3, 5, 8, 10

Positive Social Impact

- 25% ethnic diversity across the workforce
- 80% staff engagement score target
- Community health outreach in all 4 countries
- 30% female representation in senior leadership
- 85% patient experience score target
- Free health screenings & CSR programmes

3

SDGs 16, 17

Governance & Risk Management

- JCI Gold Seal 8th Edition — The View Hospital 2025
- 100% mandatory ESG & safety training
- Cybersecurity governance roadmap active
- Zero sentinel events clinical objective
- RADAR quality & compliance framework
- Annual ESG Impact Report publication

4

SDGs 3, 5, 8

Responsible Business

- 20% reduction in staff sickness absence
- 25% reduction in data security breaches
- Ethical supplier onboarding standards
- 15% reduction in staff attrition rate
- DEI policy embedded across all hospitals
- Anti-corruption & whistleblower policies

Global Networks & Shared ESG Standards

Apex Health collaborates with leading global institutions to benchmark, learn and elevate ESG practice across all operations

Geneva Sustainability Center (GSC)

SAT Active — All Hospitals

International Hospital Federation — Active Partnership

- Sustainability Accelerator Tool (SAT) deployed across all 8 hospitals
- ESG maturity assessment with hospital-specific gap identification
- Custom KPI framework with quarterly performance tracking
- Hospitals report ESG progress based on GSC framework

EPIHC — Ethics & Integrity in Healthcare

EPIHC Signatory 2025

Global Healthcare Ethics — Signatory 2025

- Ethical principles embedded in all clinical governance policies
- Alignment with global healthcare ethics code of conduct
- Accountability frameworks across all ESG decision-making
- EPIHC milestones embedded in 2025–2030 ESG Roadmap

Cedars-Sinai Medical Center, USA

Annual ESG Symposium

Clinical & ESG Exchange — The View Hospital Affiliate

- Annual symposium on ESG integration in healthcare operations
- Visiting physician programme from USA, Spain and Germany
- Visiting physician programme from USA, Spain and Germany

Asan Medical Center, South Korea

KMC ESG Framework

ESG Benchmarking — Korean Medical Center Partnership

- ESG performance benchmarking and healthcare sustainability themes
- Elevating KMC's ESG standards and community impact
- Responsible operations exchange and supply chain alignment

Environmental Protection

Net Zero Vision · Green Buildings · Resource Efficiency

Energy Efficiency & Carbon Reduction

We are actively exploring solar panels, LED lighting, and energy-efficient HVAC systems across all facilities. Our target is a 10% reduction in electricity consumption by 2026. A comprehensive carbon roadmap covering Scope 1, 2, and 3 emissions is being developed across all 8 hospitals.

Waste Management & Recycling

A medical waste recycling strategy is under active development. We are systematically assessing and reducing single-use plastics across all facilities. Our target is a 10% increase in recyclable waste year-on-year as part of our 2030 environmental framework.

Water Conservation

Hospital-specific water-saving measures are under review across all operating countries. Sustainable procurement policies for medical supplies are being researched and piloted, with particular attention to supply chain environmental impact.

Net Zero by 2030

GREEN BUILDING CERTIFICATIONS

The View Hospital (TVH) — GSAS Design & Build — 3-Star ★★★ · First private hospital in Qatar with this certification

Korean Medical Center (KMC) — GSAS Design — 2-Star ★★ · Building Certification In Progress

HAQA Algeria & Baghdad Intl — LEED Certification requirements embedded in design and construction from inception

People, Communities & Wellbeing

Apex Health team — community environmental clean-up initiative, Qatar 2025

Diversity & Inclusion

- ✓ DEI policy implemented across all 8 hospitals
- ✓ 25% ethnic diversity workforce target
- ✓ 30% female representation in senior leadership
- ✓ Inclusive hiring and leadership development programmes

Employee Wellbeing

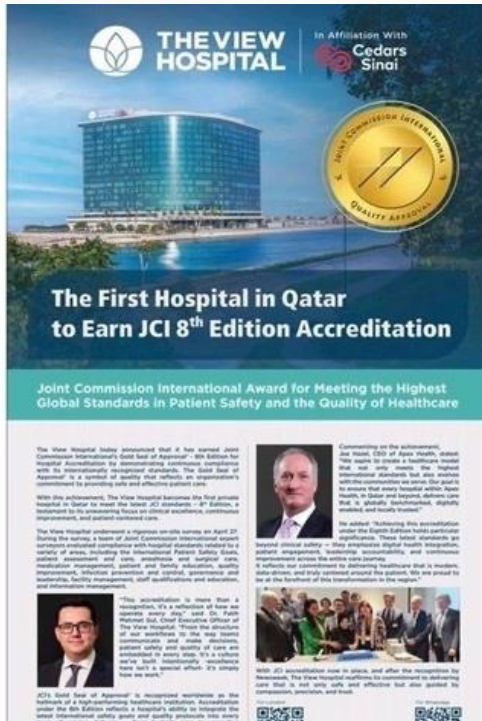

- ✓ Mental health strategy shaping wellbeing programmes
- ✓ 20% reduction in sickness absence target
- ✓ 15% reduction in staff attrition target
- ✓ 100% mandatory ESG & safety training compliance

Community & CSR

- ✓ Free health screenings across Qatar, Iraq, Libya
- ✓ Anti-smoking awareness campaigns in community hospitals
- ✓ Local organisation partnerships in all 4 countries
- ✓ Healthcare impact monitoring and outcome reporting

Transparency, Ethics & Compliance

The View Hospital — JCI Gold Seal 8th Edition, 2025

JCI Gold Seal — 8th Edition 2025

The View Hospital is the first private hospital in Qatar to achieve JCI accreditation under the 8th Edition standards. The rigorous certification covers patient safety, clinical excellence, facility management, and staff governance.

Zero Sentinel Events Objective

Our clinical governance framework targets zero sentinel events across all hospitals, underpinned by the RADAR quality and compliance management system embedded in daily operations.

100% Mandatory Training Compliance

All staff complete ESG fundamentals, in industry best practices, and data-driven decision-making programmes annually. Results are reported quarterly to senior leadership.

EpiHC Ethics Signatory

Apex Health's commitment to ethical principles in healthcare governance, global standards alignment, and fostering accountability in all ESG decisions — embedded throughout our 2025–2030 Roadmap.

Annual ESG Impact Reporting

Quarterly ESG performance reports are shared internally with leadership. The first Annual ESG Impact Report will be published in 2026 for external stakeholders including investors, regulators and community partners.

Ethics, Safety & Responsible Operations

Responsible Business underpins all Apex Health operations — from how we hire and retain our people, to how we procure supplies, protect data, and conduct ourselves as a corporate citizen across four countries.

People & Workforce

- 20% reduction in staff sickness absence by 2026
- 15% reduction in staff attrition rate
- DEI policy implemented across all hospitals
- Regular staff engagement surveys with 80% target score

Data Security & Compliance

- 25% reduction in data security breaches
- Monthly information governance reporting
- Cybersecurity strategy aligned with global best practice
- Annual compliance audit across all business units

Ethical Procurement

- Supplier onboarding ethical assessment
- Anti-corruption and anti-bribery policies
- Sustainable procurement policy development 2025–2026
- Supply chain environmental impact review in progress

Community & Social License

- Operating with respect for local laws and culture in all 4 countries
- Active engagement with communities around hospital sites
- Contribution to local employment and skills development
- Supporting national healthcare capacity building in Iraq & Libya

QATAR

ESG Leadership — The Heart of Our Operations

Qatar is home to Apex Health's flagship operations — including The View Hospital, the Korean Medical Center, and the Military Medical City Hospital. Qatar is our most advanced ESG market, with GSAS green certifications, JCI accreditation, and our deepest international academic partnerships.

Sustainability Program at TVH

- Sustainability Program is included in our staff orientation session.
- Environmental Rounds: Educations session happening on monthly basis in different departments.
- Sustainability Accelerator (SAT): Initiatives are monitored on Geneva Sustainability Center, and Internally on Radar system accessible to all employees.
- Quarterly ESG Committee Meetings to evaluate the initiatives among different APEX units.

**based on Geneva Sustainability Accelerator Tool: Maturity Assessment*

Preserving The Planet Starts With You

WAYS TO PROTECT THE AIR

- Avoid idling - reduce emissions from vehicles.
- Drive less; use carpooling or public transportation.
- Service your vehicle consistently.
- Report excessive smoke emissions from vehicles.
- Volunteer for community clean-ups.
- Plant trees - they provide oxygen and clean the air.
- Don't burn your waste.

Manual Thermostat Control – BMS Control

- This initiative focuses on monitoring and optimizing BTU consumption through BMS controls and Manual checks, and implementation of checklists to control temperature and cooling load during and outside of the operation hours.
- -AHU and FCU optimizations are implemented to have an energy-efficient setting, maintaining a temperature of 25°C from 10 PM to 6 AM (Except the critical areas such as IVF and Andrology Labs, MRI etc.) to ensure minimal ventilation and energy savings.
- -Manual Checklists implemented to monitor and adjust AHU, FCU, Heat Exchanger and Pumps.

WMC

German Partner

Environmental

- ✓ ESG requirements embedded in 400-bed expansion design and construction plans
- ✓ Green building standards being applied to all new construction on 77-hectare campus
- ✓ Helipad and emergency infrastructure designed with environmental impact assessment
- ✓ Energy efficiency targets aligned with Apex Health Group 2025–2030 roadmap

Social

- ✓ Provides healthcare to ~250,000 Qatar Armed Forces and affiliated personnel
- ✓ Extensive local Qatari workforce integration and skills development programme
- ✓ Staff well-being programme aligned with Apex Health Group DEI and HR policy
- ✓ Community health programmes for military families and dependents

Governance

- ✓ WMC (Germany) partnership brings international clinical governance standards
- ✓ Quality management aligned with Apex Health Group RADAR framework
- ✓ Tertiary referral centre governance — complex case management protocols
- ✓ ESG champion embedded within management team — quarterly reporting

Responsible Business

- ✓ National strategic asset — responsible operations critical to military readiness
- ✓ Government partnership governance — full compliance with Qatar Armed Forces requirements
- ✓ Ethical procurement and supply chain management for medical equipment
- ✓ Workforce diversity — multinational clinical team with Qatari leadership development

Military Medical City Hospital Managed by EWS

ENVIRONMENTAL PROTECTION

Energy Efficiency & Carbon Reduction

- EV Chargers: 3 Units - CPC 50 Kw, 3 Units - Versicharge 22 Kw. Total 6 car charging.

Waste Management & Recycling

- BiVaTec PV kitchen waste system limiting organical waste and water use
- 100 sets. 6 solar panels in each set of frame. Total 600 solar panels. The data sheet specifies the thermal capacity as 4.7 kJ/m^2 . Maximum 145 degree Celsius. A standard solar panel is roughly 1.6 m^2 and 40 mm thick. Volume per panel $\approx 0.064 \text{ m}^3 = 64 \text{ liters}$ For 600 panels: $600 \times 64 = 38,400 \text{ liters}$ of physical volume
- Cardboard segregation of the MMCH waste. Saving up to 1.2 T of waste monthly

Water Conservation & Sustainable Procurement

- Automatic sensor in all the hospital for water taps to reduce water consumption

Arab Hospitals Federation — Silver Award: Safety & Quality of Care · Social Impact Award

ESG-related challenges:

- Incinerator operating in three shifts
- No waste segregations/ management
- Damaged and degraded landscaping areas.
- Many bath/washrooms require rehabilitation
- High volume of urgent maintenance works across multiple facilities.
- Lack of awareness in the community and social campaigns.
- No governance Data collection
- No policy and procedures and committees
- Absence of measurement tools of water and Electricity consumption.
- Air-conditioning systems and supporting accelerators/controllers are not functioning efficiently, limiting the ability to manage and optimize energy consumption.
- No patient Feedback for hospital services

Al Imam Al Hassan Al Mujtaba Teaching Hospital

Arab Hospitals Federation — Silver Award: Safety & Quality of Care · Social Impact Award

Switch Off the Light - Energy Conservation Awareness

- The “Switch Off the Light” initiative, aiming to embed daily responsible behavior among staff and visitors and to reduce unnecessary electricity consumption.
- hospital-wide “Switch Off the Light” awareness campaign was implemented through placing reminder stickers near light switches in staff areas, demonstrating positive behavior change and shared responsibility for energy conservation.
- The awareness activities will continue throughout 2026 to reach out the majority of staff and embed energy-saving practices into the hospital culture.

Al Imam Al Hassan Al Mujtaba Teaching Hospital

IHF - Seddigi Holding Excellence Award for Social and Environmental Responsibility
Arab Hospitals Federation — Silver Award: Safety & Quality of Care · Social Impact Award

Beat the Heat – Summer Health Awareness Campaign

Objective:

- Educate patients and the public on how to best handle **high temperatures in Iraq**
- Prevent heat-related illnesses, such as **heatstroke, dehydration, and sunburn**
- Raising awareness for patients and their companions in the hospital's waiting areas
- Position the Apex and the hospital as a proactive, community-focused healthcare leader.

Key Messages:

- Stay Cool, Stay Safe – Protect Yourself from Heatstroke, Hydration is Health.

Activities:

- Set up an awareness booth.
- Distribute informative brochures.
- Give away free water bottles.
- Provide branded hats to attendees.

World No Tobacco Day Campaign Results

- Random sample survey of 103 individuals, among whom 76 (74%) were smokers.
- 89% of smokers use **cigarettes** as their primary smoking method.
- 70% consume **31–45 packs per month** (approx. 1–1.5 packs/day).
- 41% have smoked for **over 20 years**, and 25% for 11–20 years, indicating high levels of long-term exposure.
- Data shows a clear association between longer smoking duration and increased number of chronic diseases.
- Smokers for **more than 20 years**, show the highest burden, with over 1 in 4 suffering from 5 or more diseases.
- Smokers for **11 to 20 years**, nearly 15% had 5 or more diseases, highlighting the early onset of tobacco related damage.

“Our initiative demonstrates that awareness, data, and personalized counseling must be central to any hospital-based anti-smoking campaign”

Arab Hospitals Federation — Silver Award: Safety & Quality of Care · Social Impact Award

Governance Data Governance Framework

- **Data Governance Framework** was initiated to strengthen the accuracy, reliability, security, and ethical use of hospital data and to directly support reporting and decision-making.
- current data practices were reviewed with the Quality and Patient Safety (QPS) team to identify gaps, define required policies and KPIs, and improve data collection, validation, extraction, and reporting processes. strengthened and standardized reporting mechanisms to ensure consistent, transparent.

ESG Framework
Deployed

Environmental

- ✓ ESG framework adapted for Di Qar Governorate operational context
- ✓ Medical waste management protocols established — regulatory compliance prioritised
- ✓ Environmental baseline assessment conducted for facility infrastructure
- ✓ Energy consumption monitoring initiated — reduction targets being set for 2026
- ✓ Sustainable procurement review — local supply chain assessment underway

Social

- ✓ Serving underserved Di Qar Governorate population with tertiary-level care
- ✓ Local Iraqi medical professional employment and development priority
- ✓ Teaching hospital mandate — supporting Iraq's next generation of healthcare professionals
- ✓ Community health outreach — maternal, child health and chronic disease focus
- ✓ ESG Champion (Chaitanya Haribandi) embedded in Support Services team

Governance

- ✓ Quality management system implemented aligned with Apex Health Group standards
- ✓ ESG reporting integrated into monthly hospital management reporting cycle
- ✓ Clinical governance adapted to Iraqi Ministry of Health regulatory framework
- ✓ Transparent audit trail for all procurement and clinical governance decisions

Responsible Business

- ✓ Awarded through transparent competitive Iraqi government tender process
- ✓ Ethical operations in a complex post-conflict governance environment
- ✓ Supporting restoration of Iraq's healthcare capacity — strategic national role
- ✓ International management standards applied to local operational context

Energy Saving & SEU Rehabilitation

ENERGY REDUCTION

18.5%

↓ Annual kWh Consumption

SEU EFFICIENCY GAIN

+32%

↑ COP & Thermal Performance

Boiler Systems

Thermal Efficiency: Complete overhaul of burner controls, high-grade insulation, and condensate return loops to eliminate steam leakage and thermal energy waste.

Cooling Towers

Chiller Optimization: Modernized wet-deck packing, automated blowdown, and Variable Frequency Drives (VFDs) for peak heat dissipation in extreme temperatures.

Central HVAC

Air Handler Modernization: Retrofitted Air Handling Units (AHUs) with EC fans, variable air volume (VAV) controls, and dynamic climate zoning across hospital wards.

Power Generators

Diesel Genset Upgrade: Serviced major backup generators, optimized fuel injection efficiency, and integrated smart automatic load-shedding to minimize fuel consumption.

Significant Energy Users (SEU) – Boilers / Chillers

Hospital utility upgrades systematically target the highest energy consumers, delivering resilient 24/7 cooling and power while achieving ESG sustainability targets.

Empowering Healthcare Workforce

Structured capacity building ensures staff at all operational levels actively lead ESG transformations, embedding environmental stewardship directly into patient care and hospital culture.

Baghdad International Hospital

Al-Zaafaraniyah, Baghdad · 400 Beds · Tertiary Care Facility · In Development

Licensed by Iraq's National Investment Commission · Groundbreaking under patronage of Iraq's Prime Minister

400

Planned Beds

NIC

Iraq Licensed

LEED

Design Standard

2027

Target Opening

Environmental — ESG from Day Zero

- ✓ LEED Certification requirements fully integrated into architectural design brief
- ✓ Environmental impact assessment completed as part of National Investment Commission licensing
- ✓ Green building standards applied from inception — not retrofitted after construction
- ✓ Renewable energy provisions (solar) incorporated into facility master plan
- ✓ Waste and water management systems designed to international sustainability standards

Social

- ✓ Designed to serve the Baghdad metropolitan area — Iraq's largest population centre
- ✓ Local workforce development mandate built into project governance framework
- ✓ Medical education partnership envisaged — potential academic hospital designation
- ✓ Community health impact assessment conducted as part of project planning process
- ✓ Groundbreaking ceremony under patronage of Iraq's Prime Minister — national significance

Governance

- ✓ National Investment Commission (NIC) licence — highest-level Iraqi regulatory approval
- ✓ International project governance standards applied throughout design and development
- ✓ Apex Health Group ESG framework will be applied from first day of operations
- ✓ Planned JCI accreditation track built into 5-year post-opening operational plan

2026–2027 Pipeline Commitments

- ✓ Complete architectural design and construction procurement with LEED requirements
- ✓ Establish project ESG reporting framework ahead of construction commencement
- ✓ Finalise workforce development and local employment strategy for operations
- ✓ Progress environmental and social impact assessments for construction phase

LIBYA

Long-Term Partnership in Cardiac Healthcare — Building Capacity & Clinical Excellence

Libya represents a unique and deeply meaningful chapter in Apex Health's story. Through a 15-year management agreement with the Government of National Unity, we operate the Misrata Hospital for Cardiovascular Disease and Surgery — bringing international-standard cardiac care to a country rebuilding its healthcare infrastructure.

ALGERIA

HAQA Hospital — A Sustainable Healthcare Vision, Built for the Future

The Algerian Qatari German Hospital (HAQA) represents Apex Health's most forward-looking project — a 300-bed hospital developed as a joint venture with Algeria's Sovereign Wealth Fund (FNI), designed with sustainability embedded from the very first architectural drawing.

Target

Environmental — Sustainability by Design

- ✓ LEED Silver Certification requirements fully integrated into architectural design and construction brief
- ✓ Green building standards applied from Day Zero — not retrofitted post-construction
- ✓ Solar energy provisions incorporated into facility design — targeting renewable energy use
- ✓ Water recycling and conservation systems designed into hospital infrastructure
- ✓ Waste management systems designed to international sustainability standards from inception

Social Impact

- ✓ Serving Algeria's Sidi Abdellah and greater Algiers population — significant social footprint
- ✓ Joint venture structure with Algeria's FNI — deepening Qatar-Algeria cooperation
- ✓ Local Algerian workforce employment and medical professional development mandate
- ✓ International German medical partnership — bringing European clinical expertise to Algeria
- ✓ Multi-specialty model (cardiology, orthopaedics, neurosurgery, oncology) — high social value

Governance

- ✓ Joint venture governance framework agreed with FNI (Algeria Sovereign Wealth Fund)
- ✓ Apex Health Group ESG framework will be implemented from Day 1 of operations
- ✓ JCI accreditation track planned — international quality benchmark from launch
- ✓ Algerian Ministry of Health regulatory compliance built into project governance structure

2026–2027 Pipeline Commitments

- ✓ Complete HAQA Hospital construction to LEED-compliant specifications
- ✓ Establish full HAQA Hospital ESG governance framework before opening
- ✓ Recruit and train Algerian medical and administrative workforce — local-first strategy
- ✓ Progress JCI accreditation pre-assessment as part of hospital opening preparation

Six Milestones to Net-Zero Leadership

Apex Health collaborates with leading global institutions to benchmark, learn and elevate ESG practice across all operations

2025

ESG Framework & Reporting

- ✓ ESG maturity assessment & KPIs across all 8 hospitals
- ✓ EPIHC signatory & UN SDG alignment completed
- ✓ Quarterly performance reports launched
- ✓ GSC SAT tool deployed — all business units

2026

Accreditation & Expansion

- ✓ GSAS certifications expanded to Iraq & Libya hospitals
- ✓ Publish first Annual ESG Impact Report externally
- ✓ First carbon footprint baseline measurement — all facilities
- ✓ Expand CSR and community health programmes

2027

Integration & Workforce

- ✓ ESG training embedded in all staff onboarding
- ✓ Sustainable supply chain policies fully implemented
- ✓ Ethical procurement framework complete group-wide
- ✓ HAQA Algeria opens — ESG from Day 1

2028

Performance Optimization

- ✓ Benchmark against global ESG leaders in healthcare
- ✓ Publish second Annual ESG Impact Report
- ✓ Climate resilience strategies advanced across all markets
- ✓ Data security and cyber governance standards elevated

2029

Sustainable Operations

- ✓ JCI Sustainability Accreditation — The View Hospital & Military Medical City Hospital
- ✓ GHA Medical Travel Accreditation (TVH)
- ✓ Waste, water & energy programmes at full maturity
- ✓ All hospitals on net-zero trajectory

2030

Net-Zero Leadership

- ✓ Full Qatar National Vision 2030 alignment achieved
- ✓ Net-zero carbon roadmap across all 8 hospitals
- ✓ Global ESG healthcare leadership recognised
- ✓ Annual ESG Impact Report — sixth edition published

What Comes Next

Building on our 2025 foundations — deepening ESG integration across every facility, every country, every discipline

ESG Framework & Reporting

- ✓ Expand GSAS certifications to Karbala, Nasiriyah and Misrata hospitals
- ✓ Launch full carbon footprint baseline measurement across all 8 hospitals
- ✓ Deploy renewable energy feasibility studies at TVH and KMC
- ✓ Introduce medical plastic reduction pilot at The View Hospital
- ✓ Integrate climate risk review findings into operational decision-making

Social

- ✓ Publish first formal Apex Health Diversity, Equity & Inclusion Report
- ✓ Expand community health outreach programmes to all 4 operating countries
- ✓ Launch 2026 ESG Training Calendar for each Business Unit
- ✓ Roll out e-learning ESG onboarding modules for all new staff
- ✓ Strengthen local workforce development programmes in Iraq and Libya

GOVERNANCE

- ✓ Publish first Annual ESG Impact Report for external stakeholders
- ✓ Complete full alignment audit with 17 UN SDGs across all hospitals
- ✓ Strengthen ESG reporting via GSC Sustainability Accelerator Tool
- ✓ Progress GHA Medical Travel Accreditation for The View Hospital
- ✓ Implement whistleblower and anti-corruption policy group-wide

PARTNERSHIPS

- ✓ Deepen Geneva Sustainability Center collaboration and KPI framework
- ✓ Advance EPIHC ethics governance integration across all business units
- ✓ Explore ESG benchmarking with Cedars-Sinai and Asan Medical Center
- ✓ Establish formal Apex Health ESG working group with international peers

Shaping a Healthier, Sustainable Future

"We are committed to ESG not just as a framework, but as a conviction. This report is our accountability to you."
